

The innovation stakeholders are finally gathered on one platform:  
The Innovation Finder

Geneva, Wednesday, November 22

The Innovation Finder is a new platform, launched by the Nomads Foundation, which brings together all the innovation stakeholders.

This pilot initiative aims to highlight innovative companies and institutions in the region. Grouped into 7 families, their interactions are facilitated on this new platform.

The aim is to boost the Swiss economic ecosystem made of the following actors: Startups, SMEs / SMIs, Multinationals, International Organizations and NGOs, Hubs (Organizations supporting and hosting innovation), Investors and Universities, HES, Research and Professional Training Centers.

The platform contains valuable and comprehensive information on the actors that make the wealth of our canton such as: investments, open positions, the management team, etc.

STEP 1: November 22nd, 2017 marked the launch of the first step by a "call to action" to the innovation stakeholders based in the Geneva region by inviting them to validate (and complete) their profile in the database.

All innovative organizations in the canton are invited to register on the [geneva.innovationfinder.ch](http://geneva.innovationfinder.ch) website.

STEP 2: After the first phase of crowd-sourcing, this second step will make the full database available free of charge to the public in 2018.
